

Thank you for your interest in Larkins Sports Performance Strength and Speed program. We would like to offer your athlete an individualized program, that is predicated around their unique strengths and weaknesses. The following information will expound on how we individualize the programming and what exactly Softball specific training is and looks like for your athlete.

The foundation of information we consider when assessing and designing a program for each athlete:

1) The athlete's current set of physical attributes:

Core strength-muscular force production-strong body overall. We look for balance in the posterior and anterior chains. Due to the nature of Softball, athletes create a pattern overload in certain motor units, causing dysfunction in the body. We are constantly training the opposing muscle groups to create a healthier body from a structural perspective. Softball specific, we are referring to healthy shoulder girdle and medial chain (hamstrings/ glutes/groin/ iliopsoas). In conjunction, stabilization in both areas equate to a drastic decrease in knee + upper body injury in our athletes.

Energy Systems- Softball players function at an elite level using 3 separate energy systems:

-bursts of speed: think cutting to a ground ball, changing direction: 0-10 seconds (ATP-PC System 20% of the average game)

-bouts of running lasting 5+ seconds: think Doubles, triples

-Aerobic Capacity: the ability to have the same stamina, recovery time, quickness, endurance in the later innings. (Aerobic System)

Our conditioning program specifically trains each energy system, In respect to the yearly plan for each athlete. Ensuring that they are peaking in the appropriate endurance protocols at the time it is needed most.

Speed: The ability to exhibit speed in multiple movement planes: forward, lateral, reverse and the capability to accelerate and decelerate efficiently. We break speed down into 4 components:

-Quick Feet

-Acceleration & Deceleration

-Lateral Acceleration

-Reaction

Agility- agility is an accumulation of skills and improves explosive movement, allowing the athlete to change direction faster than the opponent.

Mobility- the ability to express the body essential movements with ease and fluidity. In the example of Softball: the ability to express a deep, full range of motion squat is crucial, why? This tells us the individual has proper ankle, knee, hip, back mobility.

The inability to perform a functional squat tells us the athlete is:

A) losing force generation, while running they are slower, weaker laterally, not as stable while jumping, stopping, changing directions.

B) gravitating towards a mechanical overuse injury i.e.: groin pull, hamstring pull, lower back spasms, hip flexor inflammation, MCL or ACL injuries.

2) the realistic goal and physical changes than can occur before the start of the regular season

3) the goals for that season

5) previous injuries

6) predicted pattern overload injuries within the sport of Softball: ankle, MCL, ACL

8) stage in life cycle in this case pre/post pubescent

9) Softball specific skill set:

-slow first step

-weak trunk/core

-poor endurance

-hand eye coordination

-poor stabilization of joints: knees, shoulders, hips

10) current level of general physical fitness

12) areas specific to multi-year progress {i.e.: establishing healthy body mass index, whether it's gaining weight or losing fat}

Below is an example of Softball specific workout:

Card - 1 w/Ladder Agility		Volume	Card 2 - w/ Transit Agility		Volume
Series 1	Retro Taps	x3e	Series 1	Front Plank	:30s
	Bear Crawl	:30s		Side Plank	:30s
	Cadence Bird Dog	:30s		Quad Stretch -> Anterior Reach -> Fwd Lunge w/Reach	4e
Series 2	Knee Pull -> Fwd Lunge -> Reach/Pull	4e	Series 2	Bear Crawl -> Hip Flex	:30s e
	High Knees 3e	1 length		A Skip 8yds	12e
	Alt Hop Load	1 length		Backwards A Skip	12e
Series 3	Lateral A Skip	down/back	Series 3	Lateral Skip/Catch 5yds e	6e
	High Hip -> Lat Lunge -> Reach/Pull	4e		Ant Reach -> Airplane	4e
	Lat A Skip	down/back		Tempo Alt. Bound x2	4e (1:3:1)
Series 4	Icky (Stick)	down/back	Series 4	Standing Alt. Hip Flexion -> Reach/Pull	4e
	3:2 Heiden	down/back		Power Skip Height x2	4e
	Anterior Reach -> Reverse Lunge -> Reach/Pull	4e		Messier Squat -> Punch/Pull	:30s
Series 5	Alt Drop Lunge	down/back	Series 5	Carioca -> high trail leg x2	6e
	Icky Height/Spring	down/back		1/2 Kneeling Start -> Breakdown (70%)	8yds e
	Split Jump -> Linear Start	down/back		Heiden -> Lateral Sprint	8yds e
	Heiden -> Lateral Start 5yds	down/back		Build up 8yds -> 2s Full Sprint	8yds + 2s e

Warm up prior to workouts, hitting, pitching and practices. The **warm-up** should gently prepare the body for **exercises** by gradually increasing the heart rate and circulation; this will loosen the joints and increase blood flow to the muscles.

Workouts that are exercise, weight, volume and position specific. As aforementioned, workouts are structured around a multi-year development model. The Long-Term Athlete Development (LTAD) model is a physiological framework proposed to manage the focus, volume and type of training applied to athletes as they develop through adolescence into adulthood. There remain a number of question marks against the foundations of LTAD, though it provides a sound framework for sporting development. It does however introduce a number of practical challenges, and its success requires that coaches recognize the potential barriers and conflicts.

In sports like Softball, many injuries are a result from what is referred to as “pattern overload” or any repeated movement patterns. Pitchers are quite vulnerable, and we take this into consideration while training them pre, post and in season. Above is an example of specific workouts we utilize to maintain elite level soft tissue health, mobility, and increase in strength and power output.

Overview:

Unlimited weekly Sessions a week
Strength/Conditioning/Speed/Agility
Entry Assessment, follow up assessments every 12 weeks
Nutritional information & guidance

Prices:

\$175 per month

Combo package:

\$600- 3 months Strength training + Hitting or Pitching skills (2x per week)

Please reach out with any questions or concerns:

Billy Larkins:

BillyL573@gmail.com

Available Fall Hours:

Monday: 6:00am-1:00pm; 3:00pm-9:00pm
Tuesday: 6:00am-1:00pm; 3:00pm-9:00pm
Wednesday: 6:00am-1:00pm; 3:00pm-9:00pm
Thursday: 6:00am-1:00pm; 3:00pm-9:00pm
Friday: 6:00am-2:00pm; 3:00pm-6:00pm
Saturday: 8-12:00pm or by appointment
Sunday: 9:00am-12:00pm; 4:00-6:00pm
